

KORAUNUI SCHOOL CELEBRATES

This is a National honour and comes with significant recognition. Mana in the education community but also a significant monetary recognition.

We are so proud of our lovely Mrs C. We think she is so deserving of this prestigious prize. Her enthusiasm for science is infectious. The children she has worked with acknowledge the FUN that is learning in a real way.

Dianne's willingness to share her expertise with other staff is inspirational and we feel very privileged to work alongside her as our Colleague.

Dianne Christenson's science and teaching knowledge is amazing.

This prize is amazing, as it is the first time a Primary teacher has *ever* been awarded this prize.

She was in illustrious company. The other recipients were very well respected in the science community. You can find more information on the Prime Ministers science prizes web site.

If you were unable to see the Seven Sharp news item on Tuesday night, there is a link on our school website. We had some of our wonderful children sharing their passion for science as well.

CONGRATULATIONS FROM A PROUD SCHOOL
