

IN & OUT WINDOW

You can make pictures to stick on your window that can be seen from both the inside and the outside. There is plenty of clear plastic, so other whanau, no matter what age, may like to also have a go. If you find you need more stickers, please pm me the colours, quantity needed, and your address and I'll drop off to you.

It looks easy, BUT... **READ THE INSTRUCTIONS FIRST!**

1. Think about what you want to create. You might have other stickers at home you could also use.
2. Think about the layers. For instance, if you are making a bird, you would do the body, then on top of the body you would do the feathers, add a tail, add a beak, add the eyes.
3. It is a good idea to draw the layers on card to trace around.
4. Choose a sheet of clear plastic and cut it the size you want, or wait and trim it when your picture is finished. Make sure it will fit on the window you have chosen!
5. Choose your first colour: Fold two stickers together and trace around your card shape.

6. CUT THE TWO STICKERS AT THE SAME TIME! In that way, they will match when you do the reverse side.

DON'T do letters....it doesn't work on the other side...except for some very special words like AHA. I wonder why that is!

7. Put one sticker on to the clear plastic where you want it.
8. Turn the clear plastic over and put the other sticker you cut at the same time on top of the first sticker as accurately as you can, so you have the colour on both sides.
9. Continue building up your picture in this way until you are happy with it. You can use a vivid for highlighting.
10. If needed, trim the clear plastic so it is closer to the picture.
11. Use a few of the clear stickers to attach your picture to a window.
12. If you are comfortable to do so, post a photo of your picture onto the school website. **HAVE FUN!**
